

Juan Esquivel

A native of San José, Costa Rica, Juan Esquivel completed his undergraduate computer engineering studies at the Instituto Tecnológico de Costa Rica (ITCR). Upon graduation, he worked at a software development company in San José, where he performed various tasks including security and quality assurance. Additionally, he held a part-time faculty appointment in the undergraduate Computer Engineering program at ITCR. Juan later pursued a master's degree in business, majoring in marketing.

Thanks to his International Fulbright Science and Technology Award, Juan began his doctoral studies in Computer Science with major research interests in the field of Bioinformatics. He is currently developing his work at the Kihara Bioinformatics Laboratory at Purdue University.
