

Mehmet Remzi Dogar

Mehmet Remzi Dogar, from Ankara, Turkey, received his Bachelor and Master of Science degrees in computer engineering from Middle East Technical University in Ankara. During his master's studies, Mehmet worked on a robotics project called MACS, funded by the European Commission. His thesis topic explored how to make robots learn new behaviors by interacting with the environment.

Mehmet received his International Fulbright Science and Technology Award in 2008 and is now a doctoral student Carnegie Mellon University's Robotics Institute. His research interests involve humanoid robot manipulation and planning in everyday environments.
