

Naveen Sundar Govindarajulu

Naveen Sundar Govindarajulu grew up in Coimbatore, India and completed his undergraduate studies at Birla Institute of Technology and Science (BITS), Pilani.

He pursued a master's degree in physics and participated in research projects at some of India's premier research institutes, including the Indian Space Research Organization and the Tata Institute of Fundamental Research under the Visiting Students' Research Program in 2005. He went on to complete a master's degree in electrical and electronics engineering at BITS, during which he was awarded a GE Foundation Scholarship. Fueled by a strong desire to explore the

theoretical foundations of artificial intelligence, Naveen made a gradual shift towards studying computer science and worked as a research consultant at Hewlett-Packard, submitting several patents.

Naveen was awarded an International Fulbright Science and Technology Award in 2008 and is currently a doctoral student at Rensselaer Polytechnic Institute where he examines machine learning and artificial intelligence. In addition to his doctoral studies, he has an active interest in philosophy and enjoys traveling to remote villages.
